| Read all instructions carefully and completely before installing your new RACE PROTM Intake. Remove the (2) allen bolts from the center of the stock air cleaner to remove the cover. Remove the (3) bolts securing the air filter. Remove the stock (2) breather bolts from the cylinder heads. Discard the air box, air filter, hardware and seals/gaskets. NOTE: Some California models will have a charcoal canister vent tube that must be disengaged before removing air box. Remove and save the vent tube grommet from the stock air box. Place the supplied o-rings onto both supplied breather bolts. Insert the breather bolts through the openings in the supplied support bracket and begin threading into the cylinder heads. Insert the supplied gasket between the support bracket and throttle body and line up all the holes, then snug the breather bolts, but do not fully tighten. Insert the (2) supplied breather hoses through the mounting plate and into the velocity stack with the hoses rotated outward, as shown in FIGURE 1. Make sure the breather hoses are bottomed out in the back of the velocity stack. NOTE: California models will need to install the vent tube grommet into the designated hole in the mounting plate, see FIGURE 1. Insert (3) supplied 1/4"-20 x 7/8" buttonhead bolts with lock washers through the mounting holes in the velocity stack and base mounting plate, then position on top of the installed support bracket (Step 2), and start threading the buttonhead bolts into the throttle body, but do not tighten. See FIGURE 1. Snug the (3) buttonhead bolts eveny, and then fully tighten them to the throttle body. Fully tighten the (2) breather bolts from Step 2. Insert outer end of rubber hoses over nipples on breather bolts. California Models: Insert the charcoal canister vent tube through the grommet installed in Step 3. Place the supplied X&N® filter onto the velocity stack. | $ \begin{array}{c} 1 - 1 \\ 1 - 1 \\ 1 - 1 \\ 1 - 1 \\ 1 - 2 \\ 1 - 1 \\ 2 - 0 \\ 2 - 1 \\ 3 - 1 \\ 3 - 1 \end{array} $ | NTAKE COVER ASSEMBLY 3 - SPACERS (&N® VENTURI AIR FILTER 3ASE MOUNTING PLATE BILLET VELOCITY STACK SUPPORT BRACKET NTAKE GASKET D-RING, SLILCONE BREATHER HOSE, SPORTSTER BREATHER BOLT, 1/2"-13 X 1" 30LT, 1/4"-20 X 7/8", BUTTONHEAD W/ LOCK PATCH .OCK WASHER, 1/4" TOOTHED | | HARLEY: | 20 | 004 - 2017 |
| Remove the (2) allen bolts from the center of the stock air cleaner to remove the cover. Remove the (3) bolts securing the air filter. Remove the stock (2) breather bolts from the cylinder heads. Discard the air box, air filter, hardware and seals/gaskets. NOTE: Some California models will have a charcoal canister vent tube that must be disengaged before removing air box. Remove and save the vent tube grommet from the stock air box. Place the supplied o-rings onto both supplied breather bolts. Insert the breather bolts through the openings in the supplied support bracket and begin threading into the cylinder heads. Insert the supplied gasket between the support bracket and throttle body and line up all the holes, then snug the breather bolts, but do not fully tighten. Insert the (2) supplied breather hoses through the mounting plate and into the velocity stack with the hoses rotated outward, as shown in FIGURE 1. Make sure the breather hoses are bottomed out in the back of the velocity stack. NOTE: California models will need to install the vent tube grommet into the designated hole in the mounting plate, see FIGURE 1. Insert (3) supplied 1/4"-20 x 7/8" buttonhead bolts with lock washers through the mounting holes in the velocity stack and base mounting plate, then position on top of the installed support bracket (Step 2), and start threading the buttonhead bolts into the throttle body, but do not tighten. See FIGURE 1. Snug the (3) buttonhead bolts even ipples on breather bolts. California Models: Insert the charcoal canister vent tube through the grommet installed in Step 3. Place the supplied K&N@ filter onto the velocity stack. Place the supplied N&N@ filter onto the velocity stack. Place the RACE PRO intake cover over the air filter so that there is a 12-point bolt centered between the top two mounting plate threaded holes. See FIGURE 2. Snug the (3) bolts evenly until the intak | Ins | struction Manual > | 6 | 06-0103-05/05B/05 | BC/05CB | Page 1 of 2 |
| (3) bolts securing the air filter. Remove the stock (2) breather bolts from the cylinder heads. Discard the air box, air filter, hardware and seals/gaskets. <i>NOTE:</i> Some California models will have a charcoal canister vent tube that must be disengaged before removing air box. Remove and save the vent tube grommet from the stock air box. 2. Place the supplied o-rings onto both supplied breather bolts. Insert the breather bolts through the openings in the supplied support bracket and begin threading into the cylinder heads. Insert the supplied gasket between the support bracket and throttle body and line up all the holes, then snug the breather bolts, but do not fully tighten. 3. Insert the (2) supplied breather hoses through the mounting plate and into the velocity stack with the hoses rotated outward, as shown in FIGURE 1. Make sure the breather hoses are bottomed out in the back of the velocity stack. <i>NOTE:</i> California models will need to install the vent tube grommet into the designated hole in the mounting plate, see FIGURE 1. 4. Insert (3) supplied 1/4"-20 x 7/8" buttonhead bolts with lock washers through the mounting holes in the velocity stack and base mounting plate, then position on top of the installed support bracket (Step 2), and start threading the buttonhead bolts into the throttle body, but do not tighten. See FIGURE 1. 5. Snug the (3) buttonhead bolts evenly, and then fully tighten them to the throttle body. Fully tighten the (2) breather bolts from Step 2. 6. Insert outer end of rubber hoses over nipples on breather bolts. <i>California Models: Insert the charcoal canister vent tube through the grommet installed in Step 3.</i> 7. Place the supplied Na® filter onto the velocity stack. 8. Place the RACE PRO intake cover over the air filter so that there is a 12-point bolt centered between the top two mounting plate. See FIGURE 2. 9. Insert the 2-3/4" long 12-point bolts through the 3 outer holes | F | Read all instructions carefully and completel | y befor | e installing your ne | ew RACE PRO | ™ Intake. |
| Place the supplied o-rings onto both supplied breather bolts. Insert the breather bolts through the openings in the supplied support bracket and begin threading into the cylinder heads. Insert the supplied gasket between the support bracket and throttle body and line up all the holes, then snug the breather bolts, but do not fully tighten. Insert the (2) supplied breather hoses through the mounting plate and into the velocity stack with the hoses rotated outward, as shown in FIGURE 1. Make sure the breather hoses are bottomed out in the back of the velocity stack. NOTE: California models will need to install the vent tube grommet into the designated hole in the mounting plate, see FIGURE 1. Insert (3) supplied 1/4"-20 x 7/8" buttonhead bolts with lock washers through the mounting holes in the velocity stack and base mounting plate, then position on top of the installed support bracket (Step 2), and start threading the buttonhead bolts into the throttle body, but do not tighten. See FIGURE 1. Snug the (3) buttonhead bolts evenly, and then fully tighten them to the throttle body. Fully tighten the (2) breather bolts from Step 2. Insert outer end of rubber hoses over nipples on breather bolts. California Models: Insert the charcoal canister vent tube through the grommet installed in Step 3. Place the RACE PRO intake cover over the air filter so that there is a 12-point bolt centered between the top two mounting holes. See FIGURE 2. Insert the 2-3/4" long 12-point bolts through the 3 outer holes in the intake cover and through the spacers to the base mounting plate threaded holes. See FIGURE 2. Snug the (3) bolts evenly until the intake cover tightens down onto the spacers. Then tighten the bolts securely. | 1. | (3) bolts securing the air filter.
